GEOTAB EVSA WINS SUSTAINABILITY PRODUCT OF THE YEAR AWARD FROM BUSINESS INTELLIGENCE GROUP

“Geotab is thrilled to announce that it has been named a winner in the Business Intelligence Group’s 2024 Sustainability Awards. This award honors organizations worldwide that have made sustainability a core part of their business practices.”

In a world where sustainability has become an imperative, innovations that drive energy efficiency and emissions reduction are more critical than ever. Geotab, a global leader in connected vehicle solutions, has been recognized for its significant contribution to this field with the Sustainability Product of the Year award from the Business Intelligence Group.

Impact and Awards

EVSA has not only identified millions of dollars in potential savings through electrification, but has also won the SEAL Sustainable Product Award 2024 for innovation and impact. This recognition underscores EVSA's relevance in supporting decarbonization and sustainable business growth.

The Future of Sustainable

Mobility. The transition to zero emissions is essential to meet sustainability commitments and respond to customer and stakeholder demand for concrete action on climate change. With tools like EVSA and EVIA, Geotab is simplifying this process and helping commercial fleets get a customized electrification plan based on real-world data.

The Sustainability Product of the Year award is a testament to Geotab's commitment to innovation and sustainability. As the transportation sector continues to be a significant source of greenhouse gas emissions, solutions like EVSA are critical to moving towards a greener, more sustainable future.

MEET OUR TEAM

MEET OMAR M. JUAREZ

Installation manager coordinator

Meet Omar M. Juarez:

We are delighted to announce that Omar is joining our team as Installation Manager, bringing a wealth of experience in computer programming and GPS system installation. His education as a computer programmer and his fluency in English and Portuguese are invaluable assets that will strengthen our international operations.

Omar will excel in training our customers and partners, using his technical expertise to maximize the use of our platforms and tools.

OUR NEW CUSTOMERS

WELCOME
to the family!

Watchdog on Steroids

Guys & Girls

I'm constantly asking the Sales Engineers and CX Team, "How can we enhance the platform with something that the guys will use, that's needed and easy?" In fact, I'm a bit of a pain in the butt, imagine that!

Well, they did it and shut me up for once. Allow me to introduce **Watchdog on Steroids.**

I'm sure everybody has the watchdog feature on their customized dashboard, so now in addition to this, in the event of a unit being disconnected for any reason, you will receive an automated email daily with the essential info: which unit, when, what's the location? Then you will receive an automated call from the Team until together we get this situation resolved.

I'm very proud of this free-of-charge enhancement and hope you enjoy it.

Next on my list is C-Traq, our brand-new (regular) battery-operated asset tracker, is getting more alerts and more crystal-clear auto reports!

Thank you for being the best thing about CAN-AM.

See y'all soon.

Regards, Andrew.

SWITCH TO CAN-AM

ORBCOMM

Can-Am Wireless is extending an invitation to former Orbcomm clients who are now searching for a new electronic logging device provider.

Dear Customers: Please be advised that Orbcomm devices have been removed from the FMCSA Electronic Logging Device (ELD) list. To maintain compliance and continued service, we are offering a direct transition to CanAm Telematics' Geotab devices, in full compliance with FMCSA regulations. These industry-leading ELD solutions ensure effective management of your fleet. For more information on switching to Geotab devices, please contact us as soon as possible.

Orbcomm customers who make the switch to Can-Am get three months FREE on a year-long contract.

Failure to have FMCSA-approved ELDs can result in high fines.

CAN-AM CASE STUDY 2024

UT Southwestern Medical Center Dallas, TX

THE BUSINESS

BETTER BUSINESS WITH US With the best in class telematics solutions giving you a “single pane of glass” platform, instant fleet tracking and extensive analytic capabilities, Can-Am will help you harness all your data you already have, discovering any efficiency gaps and problem areas, maximizing the power of your entire fleet.

The University of Texas Southwestern researched several telematics platforms before deciding on Can-Am Geotab Telematics. Installation, implementation, and assistance to our departments has been a fantastic experience. The invaluable video telematics data, alerts, reports, and safety alert system from the dash cam has taken all our fleets to a new level of safety and efficiency”

David Siron - UTSW Police fleet manager

CHALLENGES

The challenge for UT Southwestern: with over 300 vehicles / assets the challenges are to view and review everything and all the associated data on one platform visibility, safety, compliance, utilization of its fleet during working hours, driving down insurance rates, fuel costs and maintenance issues and improving safety for staff and students alike!

SOLUTIONS

UT Southwestern, after testing Samsara and some other vendors, chose Can-Am Telematics Solutions because it provided a simple solution, utilizing SourceWell contract, providing accountability and reports with the opportunity to grow organically. Can-Am set up UT Southwestern and maintained the platform to allow the Campus to function more efficiently. In turn, saving the organization money, while allowing it to better serve its students and customers.

24/7 Support

ELD Support

Auto reports / Alerts

RESULTS

- Better Insurance Rate
- Full visibility to fleet’s locations
- Improved driver safety and risk management
- Ability to locate drivers closest to customers
- geofence reporting and alerts
- Visible decrease in speeding
- Visible decrease in idling

A LETTER FROM THE OWNER

I am writing to share with you the growing importance of **electric vehicles** in our present and their crucial role in the future of sustainable mobility. In these times of climate change and the search for **clean energy**, electric cars represent an innovative and efficient solution. Not only do they significantly reduce pollutant gas emissions, but they also offer a quieter and more economical alternative in terms of maintenance compared to internal combustion vehicles.

Looking ahead, the transition to electric vehicles is inevitable. It is expected that by 2035, the majority of new vehicles will be electric, reflecting a global commitment to reducing the carbon footprint and promoting a cleaner environment. In this context, **Geotab** is playing a key role, facilitating the management of electric vehicle fleets and supporting companies in their transition to greener mobility. With tools such as **MyGeotab, real-time tracking** of electric vehicle performance is provided, thus ensuring efficient and sustainable operation.!

I am honored to be part of this green revolution and to collaborate with Geotab, a company that not only promotes the adoption of electric vehicles, but also provides the data intelligence needed to optimize their use and performance. Together, we are making a difference, reducing dependence on fossil fuels and contributing to a more sustainable future for all. ”

Johan Rahardjo

President & CEO
