Celebrating Freedom: CAN-AM's Commitment this July 4th

Independence and Freedom at the Heart of CAN-AM

At CAN-AM, the 4th of July is a date that transcends fireworks and festivities. It is a day to reflect on the value of independence and freedom, principles that are deeply rooted in our corporate philosophy. This Independence Day, we want to reaffirm our commitment to freedom, not only as a national right, but as a right of our customers.

CAN-AM's Promise: Quality with No Strings Attached.

Our promise is to deliver the highest quality products and services, with no hidden strings attached and no oppressive financial commitments. We believe in transparency and the power of information, enabling our customers to make informed decisions that will benefit them in the long run.

This July 4th, as we celebrate independence, let us remember that true freedom lies in the ability to make our own decisions. At CAN-AM, we celebrate that freedom every day, ensuring that our customers always have the final say.

Against Restrictive Contracts: CAN-AM's Position

At CAN-AM, we recognize that true freedom encompasses the power to make choices autonomously, without the constraints of overbearing telematics contracts that not only bind our customers but also drain their financial resources. We stand firmly against such exploitative practices that compel our customers to fork out excessive fees, thereby restricting their liberty to choose and undermining their authority over personal financial matters. Our commitment is to empower our clients, offering them the flexibility and respect they deserve when making decisions that affect their lives and finances. We believe in fostering a transparent, fair, and customer-centric approach that prioritizes the needs and rights of our clients above all else. This philosophy is embedded in our operations, ensuring that our customers enjoy the highest standards of service without any hidden costs or conditions that could impede their freedom of choice.

ADVANCES IN FLEET MANAGEMENT: MYGEOTAB ANNOUNCES NEW IFTA COMPLIANCE FEATURES

Innovation and Efficiency in Fuel Tax Distance Calculation

In a world where efficiency and precision are key to fleet management, MyGeotab has once again positioned itself at the forefront with its latest update. This month, the platform has introduced a revolutionary feature that promises to transform the way transport companies calculate and report the Fuel Tax for compliance with the International Fuel Tax Agreement (IFTA). With the new 'Fuel Tax Distance' tool, MyGeotab offers an integrated solution that simplifies the compliance process, ensuring that calculations are accurate and aligned with current regulations.

The screenshot shows the 'Fuel Tax Distance Records (IFTA)' interface for 'abc_company' as of May 31, 2024. It includes a filter form with the following fields:

Date	
From	May 30, 2024
To	May 30, 2024
Days	0

Additional filter settings shown are:

- Time Zone: America/New_York
- Speed Unit: km/h

Below the filter form is a table of records:

Device	Device Group	Engine Reported VIN	Date Time	Longitude	Latitude	Odometer
vehicle1	Vehicle, Gasoline or Petrol	1f2g3h4j5k6l	May 20, 2023 3:10:23 AM	-39.42104	33.73687	82832 km
vehicle1	Vehicle, Gasoline or Petrol	1f2g3h4j5k6l	May 20, 2023 3:43:58 AM	-39.41052	33.72696	82834 km
vehicle1	Vehicle, Gasoline or Petrol	1f2g3h4j5k6l	May 20, 2023 3:45:13 AM	-39.40432	33.73247	82835 km
vehicle1	Vehicle, Gasoline or Petrol	1f2g3h4j5k6l	May 20, 2023 3:46:57 AM	-39.39539	33.74045	82836 km

Customization and Flexibility

Driver-Focused Improvements
Key improvements include giving drivers the ability to personalize their language settings, time zone, and home terminal information via the Drive App. This level of customization and flexibility is indicative of MyGeotab's dedication to meeting the unique needs of its users.

Leadership and Innovation:

Setting Industry Standards These updates further solidify MyGeotab's status as an industry leader in fleet management. By setting new standards and continuously evolving, MyGeotab stays ahead of the curve, proactively addressing market demands and delivering sophisticated solutions to the intricate challenges of modern fleet operations.

Enhancing User Experience

June 2024 MyGeotab Update The latest update to MyGeotab, set for release in June 2024, promises to significantly enhance user experience. This update is a testament to MyGeotab's commitment to continuous innovation and exceptional customer support.

MEET OUR TEAM

MEET DAVID CASTILLO

Telematics Business Development

From Nicaragua, the land of lakes and volcanoes, comes David Castillo with great energy to the Business Development department. "I bring over 16 years of market experience."

In my free time, I enjoy long hikes with my pets, listening to audiobooks, and practicing sports like soccer, basketball, and my new passion, pickleball.

All these activities make me a passionate and enthusiastic person in my work, which makes me unique in the professional field.

FUN FACT ABOUT DAVID

is that he's a lifelong AC Milan fan. He recently went to see them play in Italy for the first time, and although they lost, he got to explore the city and discovered a new love for burrata. He can eat it with anything, especially in sandwiches.

A LETTER FROM THE OWNER

I am writing to share with you the growing importance of **electric vehicles** in our present and their crucial role in the future of sustainable mobility. In these times of climate change and the search for **clean energy**, electric cars represent an innovative and efficient solution. Not only do they significantly reduce pollutant gas emissions, but they also offer a quieter and more economical alternative in terms of maintenance compared to internal combustion vehicles.

Looking ahead, the transition to electric vehicles is inevitable. It is expected that by 2035, the majority of new vehicles will be electric, reflecting a global commitment to reducing the carbon footprint and promoting a cleaner environment. In this context, **Geotab** is playing a key role, facilitating the management of electric vehicle fleets and supporting companies in their transition to greener mobility. With tools such as **MyGeotab, real-time tracking** of electric vehicle performance is provided, thus ensuring efficient and sustainable operation.!

I am honored to be part of this green revolution and to collaborate with Geotab, a company that not only promotes the adoption of electric vehicles, but also provides the data intelligence needed to optimize their use and performance. Together, we are making a difference, reducing dependence on fossil fuels and contributing to a more sustainable future for all. ”

Johan Rahardjo

President & CEO
