

CAN-AM CASE STUDY 2022

UNIFIED

Intermodal Transport
Dallas, TX

THE BUSINESS

With instant fleet tracking and extensive analytic capabilities available at your fingertips, Can-Am can help you harness the data you already have to uncover efficiency gaps and problem areas, maximizing the power of your entire fleet.

When ELDs became mandated we decided, for our drivers, on the easiest system to use, GEOTAB! Can-Am provides outstanding customer service 24/7 for our drivers and admins. It's like having an extra member of the team.

*Erica Vasquez
Fleet Manager, Unified Intermodal Transport*

CHALLENGES

The challenge for Unified Intermodal Transport, following the governments ELD mandate in 2019 was to find an Electronic Logging Device solution that would synchronize with the vehicle engine to automatically record driving time, for easier, more accurate hours of service (HOS) recording, approved by the FMCSA, easy to use and install, lastly, didn't break the bank.

SOLUTIONS

Solutions Unified Intermodal Transport chooses Can-Am telematics because it streamlines ELD compliance, and provides options to do more. Drivers can easily record their Hours of Service (HOS) status and complete vehicle inspections from their tablet or smartphone. Managers can stay up-to-date on fleet compliance with real-time access to information including violation alerts and detailed reports on drive logs and remaining hours
